Software Engineer (MERN)

March 2025 - Present (1 year 7 months)

Gurugram

As a Full-Stack Developer, I design and build Generative AI-based chatbots and voicebots, leveraging RAG pipelines with embedding generation and vector store integration (e.g., OpenSearch). I develop scalable React-based interfaces for data ingestion and collaborate across teams to integrate LLMs, automate workflows, and ensure system reliability across the stack.

Frontend Developer

September 2022 - March 2025 (2 years 7 months)

Gurugram

As a Frontend Developer, I specialize in building responsive and user-centric web applications using React.js, HTML, CSS, and JavaScript. My work includes developing intuitive interfaces for chatbot solutions, enabling seamless and interactive user experiences through dynamic UI components. I have also contributed to the creation and enhancement of student information systems, focusing on clean design, efficient data presentation, and smooth user workflows. Collaborating closely with backend teams, I ensure robust API integration and consistent data flow across the platform.
